MANIFESTATIONS OF DELIVERANCE PATTERNS

(continued)

• **STRONG MANIFESTATIONS:** Sometimes, there can be strong manifestations. When the manifestation becomes quite strong or where there is continual tearing, I will usually stop the manifestations. I then look to see if there are any other legal rights that may have been missed. All legal rights of the demons must be broken. Always remember the devil is not in charge. Encourage the person to just breathe out; take deep breaths and breathe out. This helps to expel the demons. Sometimes a forceful cough helps.

Deliverance will generally be in stages. The Lord will bring healing in one area and then as the person continues pressing forward, more and more healing and deliverance comes. The more deliverance a person gets, the apter they are to see other areas in which they need freedom and healing.

Typically, as the deliverance ministers become more experienced, they will understand and interchange freely between the deliverance ministry and prayer for physical and inner healing.

Walking out of captivity is inner healing for people. It is important to be led by the Holy Spirit and allow the gifts of the Holy Spirit to flow and operate. Deliverance is supernatural; therefore, *the Holy Spirit must lead the deliverance*.
